I'm a Software Engineer based in Bondowoso, East Java, and a true Web Development Enthusiast with a strong passion for Front-End Development. I love transforming ideas into functional, visually engaging web experiences, whether it's a simple landing page or a dynamic, interactive application.

SKILLS

Programming Languages: PHP, TypeScript, JavaScript, Python
Frontend Frameworks & Styling Library: NextJS, AstroJS, TailwindCSS, Bootstrap
Backend Frameworks: Laravel, Flask
Soft Skills: Time Management, Teamwork, Adaptability

WORK EXPERIENCE

Front End Developer	Jun 2025 - Jul 2025
Freelance	Remote
Fixed and improved the layout of more than 5 core web pages while implementing the theme requirements and design guidelines requested by the team. I enhanced the front-end interface, resulting in a more user-friendly and visually consistent experience. I collaborated with the team to resolve UI issues, improving the overall appearance and usability of the web app.	
Web Developer Intern	Sep 2024 - Feb 2025
CV Nusantara Tama	On Site
Contributed to the development of 2 web application projects from scratch within 4 months. Refined designs to meet client specifications, adjusted the UI based on client feedback, improved the overall visual appearance, and implemented pages from Figma using Laravel's Blade templating engine.	

PROJECTS

Anime Recommender System 	Mar 2025 - Apr 2025
- Developed an anime recommendation system to help users discover shows that match user personal preferences. - Analyzed user data from ~15,000 anime entries, including genres, studios, etc. - Implemented a content-based filtering algorithm using Cosine Similarity to generate personalized recommendations. - Built the web application with Laravel and integrated a Flask-based API to serve recommendation results.	
ENEWS INDO 	Jan 2025 - Feb 2025
- Built a monolithic news portal application styled with TailwindCSS, resulting in a modern and responsive user experience. - Developed a featured news page displaying posters in PNG format. - Implemented more than 10 core pages on the news portal by translating UI/UX team designs into functional interfaces, ensuring consistency and usability across the platform.	
Al-Kandari Landing Page 	Sep 2024 - Sep 2024
- Designed and built a responsive landing page for Masjid Al-Kandari, ensuring clean design, intuitive navigation, and clarity of information. - Translated and implemented Figma design mockups into a fully functional ReactJS application.	

EDUCATION

Bachelor of Applied Computer Science	Aug 2021 - Jun 2025
State Polytechnic Of Jember	GPA: GPA: 3.91/4.0
Studying the development of desktop, web, and mobile applications, as well as implementing machine learning methods.	

LANGUAGES

Bahasa Indonesia (Native proficiency) • **English** (Elementary proficiency)
